## 1. Abstract

Mars Currency (\$MARS) is a decentralized meme-driven cryptocurrency built on the BNB Smart Chain, combining humor, community power, and DeFi mechanics. Inspired by humanity's vision of becoming multi-planetary, MARS aims to be the first interplanetary crypto brand, representing exploration, innovation, and collective ownership.

The token's purpose is to bridge meme culture and real blockchain utility through staking, NFTs, and gamified governance.

---

## 2. Vision & Mission

**Vision:**

To become the digital currency of explorers — from the metaverse to Mars.

**Mission:**

To unite degens, creators, and dreamers under one token economy that rewards participation, memes, and innovation.

We believe **fun + function = the future of finance**.
